Eurol Diesel Clean Direct

Fuel additive to clean the diesel fuel system

Description

Eurol Diesel Clean Direct is formulated as a powerful one shot cure for hesitant diesel engines, to be added to either the fuel tank for a gradual clean-up or the fuel filter for an immediate effect. Eurol Diesel Clean Direct will clean up dirt and deposits throughout the diesel fuel system.

Eurol Diesel Clean Direct is recommended to be used if you experience engine hesitation, rough idling, stalling or power loss. The powerful cleaning treatment will revive the entire fuel system, allowing the engine to run smoother and more efficiently.

Eurol Diesel Clean Direct will not only improve mileage, but also performance at high RPM. The 500ml bottle of Eurol Diesel Clean Direct is recommended for use to 35L to 65L of fuel and let the Eurol Diesel Clean Direct run through the system.

Eurol Diesel Clean Direct can also be added to a new diesel fuel filter at every service interval to give the

system a one shot cleanse. If any additive remains in the bottle after filling the fuel filter, the remainder can be added to your tank.

A side benefit for adding Eurol Diesel Clean Direct to the fuel tank is that the fuel gauge may come unstuck after use, when it was stuck before.

Users should consult the Material Safety Data Sheet of Eurol Diesel Clean Direct for information about storage and shelf life. Please ask Eurol Research & Development if any further information is required.

Physical properties

Colour	Brown	
Density at 20°C	0.82 kg/l	ASTM D 1298
Viscosity, kinematic at 40°C	2.8 cSt	ASTM D 445
Flash point	62 °C	ASTM D 93
