Eurol Motorcycle Octane Booster

Fuel additive to increase the octane number of petrol

Description

Eurol Motorcycle Octane Boost has been specially formulated to increase the research octane number (RON) of petrol. At the recommended dosage, Eurol Motorcycle Octane Boost will raise the RON by 4 to 6 points.

When using Eurol Motorcycle Octane Boost, the engine will respond even quicker to changes in throttle position. The engine will feel more lively and, at constant speeds, the fuel economy will increase slightly.

Eurol Motorcycle Octane Boost prevents and eliminates pinging when the engine is operating in the high end of the RPM range. By adding Eurol Motorcycle Octane Boost, the high speed knocking resistance of the petrol is improved significantly.
Eurol Motorcycle Octane Boost can be safely used with any car equipped with a catalytic converter. Eurol Motorcycle Octane Boost can be used to boost the octane number of the fuel when the RON is insufficient for the engine to operate smoothly.

The 100 ml bottle of Eurol Motorcycle Octane Boost is recommended for use in 15 to 25L of fuel. Add Eurol Motorcycle Octane Boost to the petrol tank before refueling to ensure proper mixing.

Users should consult the Material Safety Data Sheet of Eurol Motorcycle Octane Boost for information about storage and shelf life. Please ask Eurol Research & Development if any further information is required.

Physical properties

Colour	Amber	
Density at 20°C	0.835 kg/l	ASTM D 1298
Viscosity, kinematic at 40°C	1.5 cSt	ASTM D 445
Flash point	62 °C	ASTM D 93
